Hello!

You are receiving this message because you are a presenting author for the submission [:paperid:]:
[:title:].

Please check the tentative oral contribution speaker schedule listed here (http://bit.ly/H8jfhglwuvn) or
the poster list here (https://bit.ly/3nOuTYY) , organized by OpenConfID. You will see a session
assignment, date, and time block of your talk. If you are available during that block, no further action
(other than registering for the conference) is needed at this time other than to mark it in your calendar!

Over 700 of our 970 authors let us know about scheduling conflicts (or the lack of), and we have tried to
accommodate those restrictions while still maintaining as many organized sessions and thematic general
sessions. We are certain there are errors and missing information, so we want to give you a final
opportunity to let us know if this schedule DOES NOT work for you. The deadline to do this is May 17 at
8 pm EDT. Please fill out this form (https://bit.ly/3f65Mg4).

If you submitted to an organized session and do not find your talk assigned to that session, this was
either due to a scheduling conflict or because the organizer asked to keep the sessions smaller.

You will notice your time block is three hours long. We will work as quickly as possible after the
response form closes on May 17 to reassign speakers and then send and exact and final time slot (15
mins for oral contributions) within their assigned sessions.

Registration is now open and available at https://networks2021.net/registration. We ask that all
presenting authors register by June 1 at the latest to maintain their spot. If you are waiting for news of
student fee remission (link available on the registration page), please do not put off registering - you
may either pay (and be refunded) or you can choose pay later or by invoice.

We will open the Whova conference platform to registered participants by no later than June 14. In
Whova, you will have the ability to correct errors in your title or abstract, and upload a pdf or image,
should you wish to do so. At this point the OpenConf system is closed to further edits.

We anticipate a few more direct emails to presenting authors before the conference starts, particularly
about the procedure for uploading prerecorded talks. If you are concerned about receiving emails, you
may always check our website at http://networks2021.net/correspondence to see an archive of any
mass mailings we are doing to authors about their sessions. We will be starting a newsletter with
announcements as well.

Thank you for your patience, flexibility, and most importantly to your scientific contribution to Networks
2021.

Thanks,

Networks 2021 Program Committee
